**Island nation's airport to be powered by the sun**

## **KYOCERA Provides Solar Power Generating System for Palau's Largest Solar Project**

**Kyoto/Neuss, 25 January 2012 – Kyocera Corporation announced that it has supplied a solar power generating system for the Republic of Palau international airport — the 226.8kW solar installation is the largest to be completed on the island nation located roughly 500 miles east of the Philippines. The design and implementation of the parking lot solar project was a joint collaboration between Kyocera and Wakachiku Construction Co., Ltd., which was realized with funding by the Japanese government's Official Development Assistance (ODA) to help contribute to the country's growth.**

The solar modules are installed on the top of shading structures in the parking lot. The solar power generating system, which is the first grid-connected system in the country, is comprised of 1,080 Kyocera 210W solar modules. Due to the high occurrence of typhoons on the island, the backside of the modules have been reinforced with extra support bars for enhanced wind-pressure resistance. The system is expected to produce an annual power output of 250MWh, off-setting roughly 80 tons of CO2 per year.

### **About Kyocera**

Headquartered in Kyoto, Japan, Kyocera Corporation is one of the world's leading manufacturers of fine ceramic components for the technology industry. The strategically important divisions in the Kyocera Group, which is comprised of 208 subsidiaries (as of March 31, 2011), are information and communications technologies, products which increase quality of life, and environmentally friendly products. The technology group is also one of the largest producers of solar energy systems worldwide.

## Press information

With a global workforce of about 66.000 employees, Kyocera posted net sales of approximately €10.74 billion in fiscal year 2010/2011. The products marketed by the company in Europe include laser printers, digital copying systems, microelectronic components, fineceramic products and complete solar power systems. The Kyocera Group has two independent companies in the Federal Republic of Germany: Kyocera Fineceramics GmbH in Neuss and Esslingen and Kyocera Mita Deutschland GmbH in Meerbusch.

The company also takes an active interest in cultural affairs. The Kyoto Prize, a prominent international award, is presented each year by the Inamori Foundation — established by Kyocera founder Dr. Kazuo Inamori — to individuals and groups worldwide who have contributed significantly to the scientific, cultural, and spiritual betterment of humankind (converted at present €500.000 per prize category).
